

Female Standard Stage Makeup

Directions for Application:

1. Apply foundation overall. (Don't forget under chin, neck, hairline, ears, etc.)
2. Define eyes with liner. Meet at outer corner of eyes. Go beyond only when indicated for a stronger made-up look.
3. Do define and smooth eyebrows, especially if not prominent.
4. Contour as needed (any contouring can be done at this time as needed to further define eyes - lids, shorten or lengthen nose, define chin, cheekbones etc.)
5. Apply other color IF SPECIFIED to lid.
6. Apply blush to "apples" of cheeks and cheekbones.
7. White in corner of eye (optional) creates a more "open eyed" appearance.
8. Line and color lips (liner optional) to match own "blooded" flesh tone unless bolder color is indicated for character.
9. Apply mascara. Avoid racooning by NOT applying too heavily on lower lashes.
10. Apply translucent powder to finished face to "set" and remove all shininess.
