

Easy Theater Makeup for Guys!

1 Start with a clean face.

2 Apply a light foundation overall. Pressed powder, creme, or liquid are all fine.

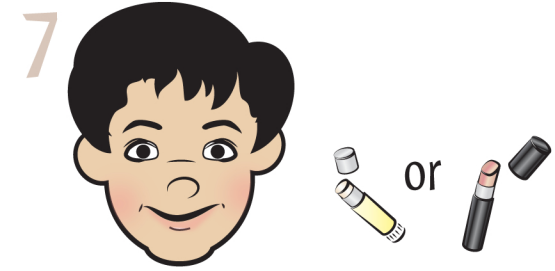

3 Apply blush to apples of cheeks

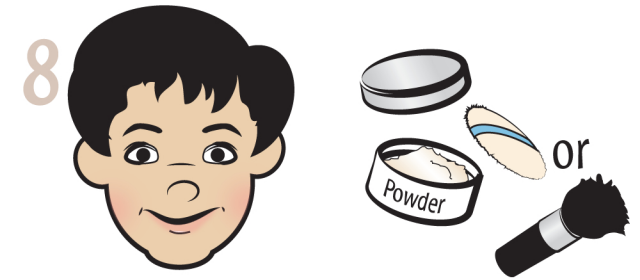

4 Define brows. You may use a powder brow definer if you prefer.

5 Line eyes from outer edges to a little beyond the center of the eye

6 Apply loose translucent powder when finished to keep the on-stage shine at a minimum.

~ Intermission ~

7 Apply lip balm. Use a light, natural lipcolor on your lips if they are pale.

8 During Intermission, make sure to powder again — everyone gets shiny on stage!
